

Fagus GS 95R

FAGUS GS 95R is a high quality, high performance fully biodegradable lubricant obtained by chemical synthesis of 100% renewable vegetal raw materials.

As a metal forming neat versatile lubricant (stamping, deep-drawing bending, embossing), FAGUS GS 95R mainly destined for aluminum and its alloys processing.

Fagus GS 95R

FAGUS GS 95R especially used in the production of aluminum foil for food applications, protecting the foil surface from winding / unwinding operations. It is approved as NSF 3H & NSF-H1 and has the HALAL and KOSHER certifications.

Advantages:

- Easy application by spraying or direct dipping.
- Environmentally and human friendly.
- Liquid at room temperature.
- Multifunctional use (Coating, pre-lube, releasing agent, forming, stamping and deep drawing).
- Excellent mechanical and thermal stability.
- Film forming with very good adherence to metal surface.
- Protection of strips and foil from abrasion and scratching.
- Uniform distribution on the surface and low consumption.

FAGUS GS 95 is developed and produced by DOMUS CHEMICALS SPA, and distributed exclusively by PROIL / PETROYAÇ group of companies.
